-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ____ MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 23rd, 2005 has been entered.

Response to Arguments

2. Applicant's arguments with respect to claims 1-161 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-161 are rejected under 35 U.S.C. 102(e) as being anticipated by Lewis (6,266,565).

Art Unit: 3621

5. As per claim 1, Lewis et al teach a security system for secure value-bearing items in a wide area computer network comprising a plurality of user terminals coupled to the computer network, a database including information about one or more users using the plurality of terminals a plurality of cryptographic device remote from the plurality of user terminals and coupled to the computer network, wherein the cryptographic device includes a computer executable code for authenticating one or more users, wherein each of the plurality of cryptographic devices is programmable to service any of the plurality of user terminals; and a plurality of security device transaction data stored in the database for ensuring authenticity of the one or more users, wherein each security device transaction data is related to a user, wherein the cryptographic device authenticates the identity of each user and authenticates the user for a role the role limiting the user to a subset of operations performed by the system (*see figs 1-3 and their accompany text*).

6. As per claims 2, 4-52, 54-94, 96-119 and 121-161, they are rejected under the same rationale as claim 1 since their disclosures are similar in nature and do not further limit the claims. Moreover the claimed limitation in claims 2, 4-52, 54-94, 96-119 and 121-161 are clearly taught and anticipated by Lewis' disclosure.
